

07/22/08

ASME Code pressure vessel company is seeking an individual for the position of **Quality Assurance Manager**. Experience in the following areas will be the deciding factors in our selection of candidates:

- Process / Industrial Engineering in metal & welding fabrication
- Quality Assurance background
- BS degree in Mechanical, Industrial, or Civil engineering
- Experience in training methodology
- Prior experience with the ASME Boiler and Pressure Vessel Code

In addition to the above, prior experience or knowledge of ISO requirements may be beneficial for a long-term vision. Individual must be a self-starter with a strong work ethic, willing to participate in team-oriented problem solving, & able to manage a project from conception to implementation. Interested applicants should send resume and salary history to:
